

ABOUT ME

Recently, I completed a full-stack development bootcamp and successfully built several projects using Javascript, React, Sql, Prisma and Nodejs, which demonstrates my commitment to transitioning into a web development role. In my background I come with a solid formation and experience in the accounting area. I bring strong organizational and problem-solving skills, allowing me to effectively manage project timelines and resolve technical issues. I am eager to leverage my analytical and accurate mindset from my accounting background to excel in web development and continuous learning.
